Evidence of the fire can be seen well beyond the Palisades and Eaton fires, including in the sea. Scientists on boats have been collecting data to try to figure out what the fires' effects may be on Southern California's coastal environment. ... On this week's "In Focus SoCal," host Tanya McRae sits down with Annelisa Moe, associate director of science and policy at Heal the Bay, to talk about the immediate and long-term impacts of the wildfires. ... Moe also discussed what she and her team have seen out in the field doing water quality sampling on the shoreline.

"There's sort of a chocolate milk texture to the water with this brownish foam that indicates the presence of higher nutrients," Moe said.

Environmental nonprofit group Heal the Bay has been conducting tests at various beaches in the burn zone since the fires began and is beginning to get results that will lead to answers and data about the safety of beaches following the fire. ... San Diego Coastkeeper sues SeaWorld; issues report on Mission Bay's water quality

20610

"San Diego Coastkeeper's first annual report on Mission Bay's water quality shows persistently high levels of bacteria, copper, and phosphorus in both dry and wet weather, often at levels exceeding safe state water quality

Environmental nonprofit group Heal the Bay has been conducting tests at various beaches in the burn zone since the fires began and is beginning to get results that will lead to answers and data about the safety of beaches following the fire. ... There is no one timeline, and experts say the best thing to do is to stay informed and up to date on advisories and water quality information.

Investigating Post-Fire Water Quality

Civil and environmental engineering professor Jennifer Jay and doctoral students Katie Osborne and Yuhui Zhang are working with Heal the Bay to investigate the post-fire water quality in Santa Monica Bay. ... by the fires.

They were there to protest what they called a lack of transparency in the government actions taken in the aftermath of the Palisades fire. ... Annelisa Moe, associate director of science and policy and water quality scientist at the non-profit organization Heal The Bay in Santa Monica, told the Guardian, “In a situation like this, unfortunately, there are no good answers, and there isn’t really a ‘better place’.

2543

In the wake of the devastating Palisades Fire, concerns about water quality have risen, especially with more rain on the way. ... Environmental advocates with Santa Monica-based Heal the Bay are actively collecting water and sand samples to test for bacteria levels and other contaminants like heavy metals and PCBs (polychlorinated biphenyls).

3800600

"It is those households that are relatively isolated, that were built maybe 40, 50, 60 years ago, that have a relatively shallow well that are most vulnerable to this contamination," said Patrick Pulupa, executive officer of the Central Valley Regional Water Quality Control Board. ... " Read more from ... So we are again asking a lot of our ocean right now," said Annelisa Moe, the associate director of science and policy with the Santa Monica-based nonprofit Heal the Bay.

20610

At the same time, environmental nonprofit Heal the Bay is raising concerns about the county's recent declaration that the sand is safe for recreation. ... Heal the Bay and the Regional Water Quality Control Board have collected sand samples from throughout the burn area and are awaiting results. The nonprofit plans to release its ocean water and sand testing results to the public as soon as they become available.

37238

The Los Angeles county department of beaches and harbors said last week that officials were monitoring beach conditions and ocean water quality. ... The department of public health lifted the ocean water quality rain advisory last week for all Los Angeles county beaches except those affected by fire. Beaches from Las Flores beach to Santa Monica state beach were still under advisory warnings. ... "The fires burn also through vegetations that normally will help stabilize soil," said Tania Pineda-Enriquez, water-quality data and policy specialist at Heal the Bay, an environmental advocacy group. "Without this natural barrier, all the ash and soil will be washed out into the waterways."

525

The agencies that would usually organize cleanups in these areas, like Heal the Bay, are stopping all cleanups until they see more testing from the Department of Health. ... Public Health also asks people to avoid visible fire debris."

3800600

Their advisories recommend people stay away from the water and the debris, but Heal the Bay's advisory goes beyond that, asking people to stay "away from the sand."

The agencies that would usually organize cleanups in these areas, like Heal the Bay, are stopping all cleanups until they see more testing from the Department of Health. ... Public Health also asks people to avoid visible fire debris."

407199536

Their advisories recommend people stay away from the water and the debris, but Heal the Bay's advisory goes beyond that, asking people to stay "away from the sand."

But, perhaps less obvious, is the serious threat of toxic chemicals in fire-ravaged areas that gets washed into waterways, threatening water quality, public health and the environment, according to the State Water Resources Control Board. ... SEE ALSO: Phase 1 of hazardous waste removal from Eaton Fire burn area completed, EPA says, from KNBC

20610

Ash to action: Heal the Bay's post-fire water quality investigation

"On Monday, February 24, 2025, Heal the Bay learned that the Los Angeles County Department of Public Health (DPH) had stated that

The Los Angeles county department of beaches and harbors said last week that officials were monitoring beach conditions and ocean water quality. ... The department of public health lifted the ocean water quality rain advisory last week for all Los Angeles county beaches except those affected by fire. 1026157

"Risk tolerance is a deeply personal choice and right now the limited data that has been shared hasn't identified concentrations of contaminants that pose a health risk," said Tracy Quinn, president of the environmental nonprofit Heal the Bay. ... The Los Angeles Regional Water Quality Control Board is working with the county to test ocean water near areas affected by the fires, which burned more than 40,000 acres across the L.A. region last month.

“It was simply heartbreaking,” Quinn, President and Executive Director of the Environmental Group Heal the Bay, whose team has reported ashes and rubble about 40 kilometers south of the burnt area of Palisades, west of Los Angeles.

The water line was obscured by the ashes. ... When the fires broke out in January, one of Mara Dias’s first concerns was the pollution of the ocean water. The strong winds carried smoke and ashes far beyond the burned areas that ended in the sea, said the water quality manager of the Surfrider Foundation.

“It was simply heartbreaking,” said Quinn, president and executive director of the Heal The Bay Environmental Group, whose team has reported ashes and rubble about 40 kilometers south of the burned area of Palisades, west of Los Angeles.

181

The water line was obscured by the ashes. ... When the fires broke out in January, one of Mara Dias’s first concerns was the pollution of the ocean water. The strong winds carried smoke and ashes far beyond the burned areas that ended in the sea, said water quality manager of the Surfrider Foundation.

Extensive Testing: dozens of scientists and volunteers from Heal The Bay, along with various public and private sector agencies, are analyzing water and soil samples.

Strong winds were carrying smoke and ash far beyond the blazes before settling at sea, said the water quality manager for the Surfrider Foundation, an environmental nonprofit. ... Mudslides and debris flows in the Palisades Fire burn zone also can dump more hazardous waste into the ocean. After fires, the soil in burn scars is less able to absorb rainfall and can develop a layer that repels water from the remains of seared organic material.

53272

On a Sunday drive down the Pacific Coast Highway, Tracy Quinn, president and CEO of the environmental group Heal the Bay, was met with a heart-wrenching scene. The waterline was stained dark with ash, and the shoreline was littered with burnt remnants of appliances and other debris. ... Strong winds carried smoke and ash far beyond the blazes before settling at sea, said Mara Dias, water quality manager for the Surfrider Foundation. ... The fires burned thousands of homes and businesses, releasing hazardous materials into the environment. Concerns are growing about the effects on marine life, water quality, and the food chain.

219270

“It was just heartbreaking,” said Quinn, president and CEO of the environmental group Heal the Bay, whose team has reported ash and debris some 25 miles (40 kilometers) south of the Palisades burn area west of Los Angeles. ... fires could affect life under the sea. ... When the fires broke out in January, one of Mara Dias’ first concerns was ocean water contamination. Strong winds were carrying smoke and ash far beyond the blazes before settling at sea, said the water quality manager for the Surfrider Foundation, an environmental nonprofit.

Palisades Fire: A Case Study in Coastal Devastation

Heal the Bay CEO Tracy Quinn recently surveyed the damage along the Pacific Coast highway, witnessing first-hand the scars left by the palisades fire. The fire, which scorched over 1,200 acres, not only destroyed homes and infrastructure ... Debris and potentially hazardous ash continue to wash into the ocean, impacting water quality and marine life, according to recent reports from environmental groups like Heal the Bay.

"It was just heartbreaking," said Quinn, president and CEO of the environmental group Heal the Bay, whose team has reported ash and debris some 25 miles (40 kilometers) south of the Palisades burn area west of Los Angeles. ... When the fires broke out in January, one of Mara Dias' first concerns was ocean water contamination. Strong winds were carrying smoke and ash far beyond the blazes before settling at sea, said the water quality manager for the Surfrider Foundation, an environmental nonprofit. ... Mudslides and debris flows in the Palisades Fire burn zone also can dump more hazardous waste into the ocean. After fires, the soil in burn scars is less able to absorb rainfall and can develop a layer that repels water from the remains of seared organic material.

"It was just heartbreaking," said Quinn, president and CEO of the environmental group Heal the Bay, whose team has reported ash and debris some 25 miles (40 kilometers) south of the Palisades burn area west of Los Angeles. ... When the fires broke out in January, one of Mara Dias' first concerns was ocean water contamination. Strong winds were carrying smoke and ash far beyond the blazes before settling at sea, said the water quality manager for the Surfrider Foundation, an environmental nonprofit. ... Mudslides and debris flows in the Palisades Fire burn zone also can dump more hazardous waste into the ocean. After fires, the soil in burn scars is less able to absorb rainfall and can develop a layer that repels water from the remains of seared organic material.

When the fires broke out in January, one of Mara Dias' first concerns was ocean water contamination. Strong winds were carrying smoke and ash far beyond the blazes before settling at sea, said the water quality manager for the Surfrider Foundation, an environmental nonprofit. ... Mudslides and debris flows in the Palisades Fire burn zone also can dump more hazardous waste into the ocean. After fires, the soil in burn scars is less able to absorb rainfall and can develop a layer that repels water from the remains of seared organic material.

Sawser of the Army Corps of Engineers dropped a bombshell halfway through the meeting that fire debris from the Palisades was going to be moved this coming Monday into local landfills. ... City Council members have already met with representatives from the Supervisors' office, Water Quality Control Board, Army Corps of Engineers, EPA, the Sanitation District, Heal the Bay and the North Santa Monica Bay Watershed, to state their opposition.

5615

Local organizations like our partners at Heal the Bay are actively studying these impacts and what they mean for local communities and wildlife.

245540

Heal the Bay's Annelisa Moe said, "Wildfire impacts extend far beyond the shoreline. ... Moe explained, "during the 'first flush' rain event in January, our team at Heal the Bay ventured to the beaches to monitor water quality and assess the full extent of this pollution. We tested for turbidity, bacteria, heavy metals, PAHs, BCBs, PFAS, and benzene."

With these threats in mind, on two separate days, the steelhead trout population and that of the two-inch-long tidewater goby were each temporarily relocated, the trout to an undisclosed location, the goby to the Heal the Bay Aquarium in Santa Monica, with some also going to the Aquarium of the Pacific ... The water samples will be turned over for testing to the Regional Water Quality Control Board and a list of other organizations and universities.

5231

"Now we need to see what's going to happen during the rain," said Dagit.

More as we know it. So...stay tuned.

In January, Heal the Bay met with the EPA to obtain information and discuss our concerns.

"Horrrific fires always impact the shoreline habitat and water quality, as detritus and runoff from the destruction inevitably flow to the Bay. ... Rainfall can reduce the intensity of fires if there is enough of it. "The moisture from the rain can reduce the intensity of the fire by wetting any existing fire fuel, such as trees and plants," the Western Fire Chiefs Association said in an explainer article.

"In general, this is more similar to burn pit exposures than it is to forest fires," he said of the Palisades and Eaton fires. ... In Santa Monica, the sparkling waters that draw surfers, swimmers and anglers represent decades of painstaking work by nonprofits like Heal the Bay to reduce pollution and runoff. Over the past several decades, marine life has rebounded.

Last night, the Eaton Fire began in the Pasadena and Altadena area and has exploded to 10,600 acres. The Los Angeles County Fire Department said the fire has caused two civilian deaths and several injuries. As of this morning, there were over 100 structures destroyed. ... As of this morning, each fire has zero containment. 1926329

California Gov. Gavin Newsom earlier this morning announced the state has secured federal assistance to respond to all three fires. "Firefighters are working through the night to save lives & battle these aggressive fires," he said on X. ... The details: Exxon filed a lawsuit on Monday in Texas's Eastern District against Bonta, the Sierra Club, San Francisco Baykeeper, Heal the Bay and the Surfrider Foundation.

Foreign Influence Along with Bonta, the targets of Exxon's lawsuit are part of the coalition of environmentalist groups that filed the case against Exxon in September, including the Sierra Club, the Surfrider Foundation, Heal the Bay, Baykeeper and the Intergenerational Environment Justice Fund (IEJF)

Meanwhile, Heal the Bay has also issued cautions for the public, saying runoff sediment and ashes are impacting ocean waters as well.

On its website, the nonprofit advised as of Jan. 17 that county beaches were closed in the fire zones.

"There is no public access to any L.A. ... "The Los Angeles County Department of Public Health is extending the duration of the Ocean Water Advisory due to fire debris runoff," the most recent county health post from Jan. 17 reads. "Ash from the Los Angeles Fires may enter coastal water through surface water runoff and windblown ash.
